

Dan Thory

Full Stack Web Developer

Full stack web developer looking for a great opportunity to utilise my talents within a team of passionate developers. Focussed around the MERN stack, I'm resourceful, quick to learn new skills and motivated by a technical challenge. My experience in team and project management, business development and technical consultancy give me a valuable set of soft skills, enabling me to manage large projects, identify opportunities, problem solve and work successfully within a team. I am a highly motivated and conscientious person with a meticulous eye for detail and passionate about producing good design and writing clean code.
